

GOV-UNDP GEF PV PROJECT PV REBATE SCHEME

1. Fill in the applicant information, general information and details of PV System. Incomplete applications and missing documentation will delay or prevent the processing of an application.
2. Please print clearly.
 - *Seychelles Energy Commission, SEC, reserves the right to change Terms and Conditions of the scheme at any time.*
 - *For more information, please call (+248) 4 610 819 or visit us at the SEC Office, Room 307, 3rd Floor, Block B, Unity House.*

1. APPLICANT INFORMATION

Applicant/Legal Name: (or in case of company or organization) Company/Organisation Name:	
Mailing Address:	
Residence Address:	
Contact Person:	Title:
E-mail:	Phone:
Mob:	NIN/Company Registration and VAT #:
Installation address (if different from above):	
PUC Electricity Customer Account #:	

2. GENERAL INFORMATION

- A. Have you applied for, expect to apply for, or received any other Energy Efficiency and Renewable Energy rebates/incentives?
- Yes. Please complete Section B:
 No.
- B. Source of Rebates/Incentives: _____
Amount: _____

3. PV SYSTEM DETAILS (to be filled by installer)

A. PV supplier's and installer's details

Supplier Name:	
Mailing Address:	
Contact Person:	Title:
E-mail:	Phone:
Mob:	NIN/Company Registration and VAT #:

Installer/Contractor Name:	
Mailing Address:	
Contact Person:	Title:
E-mail:	Phone:
Mob:	NIN/Company Registration and VAT #:

B. Type of premises where the installation is located: (tick where applicable)

Commercial..... Residential..... Industrial..... Public building..... Institutional households.....
 Other (specify): _____

C. PV System Details

Type of panel
 Power rating of total PV System in kWp

Array 1

Panels Manufacturer and model #	Qty	Panel Power Rating (Watts DC)	Orientation	Tilt Angle	Remarks (shading, site, etc...)
Inverters Manufacturer and Model #	Qty	Serving Array (s)			

Array 2 (if applicable)

Panels Manufacturer and model #	Qty	Panel Power Rating (Watts DC)	Orientation	Tilt Angle	Remarks (shading, site, etc...)
Inverters Manufacturer and Model #			Qty	Serving Array (s)	

C. Site Survey – to be completed by PUC (Installation site survey carried out by PUC as per its PV installation procedure)

Tick if proposed system meets solar access requirement, i.e. no excessive shading or poor orientation

Name of PUC official:

Signature:

Date:

PUC Stamp

4. CERTIFICATION

The undersigned certify:

- The information provided in this application is true, complete and correct to the best of my knowledge.
- The PV system described above will be solely owned by applicant named herein and the system is intended to offset part or all of my electrical needs at the site of the installation.
- By signing this application, the Applicant and Supplier/Installer identified above have read, understand and do hereby agree to the General Terms and Conditions as stated herein and incorporated in the PV Rebate Scheme Handbook as well as the guidelines and requirements of the Scheme.

Signature of Applicant:
Date:
Signature of Installer:
Date:
Payment to be made to:

FOR SEC USE ONLY

The above PV system has been verified and commissioned as per requirements of the PV Rebate Scheme and is eligible for rebate payment to the amount of

.....
Signature

SEC's stamp

FOR PCU USE ONLY

Application Form no:

Signature:

PCU Stamp

General Terms and Conditions

The following general terms & conditions apply to the PV Rebate Scheme. It is recommended that these terms and conditions are carefully reviewed before project initiation.

1. Applicants must be a PUC customer
2. Installations must be completed in accordance with all laws, codes and other requirements applicable under local authority (e.g. permits)
3. The Rebated Solar PV System is required to remain at the address listed on this application.
4. The Customer and Contractor are responsible for obtaining all required permits (i.e. building, electrical, etc.).
5. Rebate funding is offered on a first-come, first-served basis.
6. Participation in the PV Rebate Scheme does not affect customer participation in other Renewable Energy and Energy efficiency/conservation programs.
7. The PV Rebate Scheme guidelines and rebate levels are subject to change without notice, and SEC reserves the right to refuse any application/request for rebate payment that does not meet the requirements.
8. When PV Rebate Scheme funding is exhausted, the applications are placed in a holding queue until/if more funding becomes available.
9. Final rebate amount is paid after final verification and commissioning of PV systems.
10. Prior to, paying any rebate, SEC, or its designated agents, reserves the right to conduct a site visit/audit to verify that the installed equipment is eligible for rebate. The results of a site visit/audit may determine rebate eligibility. Site visit/audit will also be conducted post installation to monitor PV system performance.
11. Customer agrees to provide access to SEC personnel or its designated agents to the solar equipment and meters for as long as the PV system is installed.
12. A rebate will, under no circumstances, exceed the maximum allowed under current PV Rebate Scheme guidelines.
13. Customer agrees that the system will be ineligible for rebate or that the rebate must be refunded to SEC if the Scheme requirements, guidelines, and terms and conditions are not complied with.
14. Customer agrees to refund the rebate to SEC if the system/equipment is not maintained per SEC terms & conditions, standards, guidelines and policies.
15. A supplier/installer's removal from the SEC Registered PV Suppliers List will render the application ineligible for rebate if the system has not been completed.

Terms and Conditions specific to PV System

16. PV system must be supplied by registered PV suppliers certified by SEC.
17. The PV system must be installed by a Certified PV Installer
18. All equipment including inverters and panels must be new.
19. All equipment (modules, inverters), must meet required standards set by SEC
20. All PV system must have a data acquisition component.
21. PV Supplier/Installer must provide SEC data on energy generation or any other as required by SEC on a quarterly basis in a manner as prescribed by SEC. SEC will record and track the amount of renewable energy generated by the PV rebated systems.

22. All PV systems must be interconnected, at customer's expense, to the electrical grid. All PV systems must comply with current network operator guidelines governing interconnection with electric system, and any subsequent revisions to these guidelines. These and other requirements are subject to change.
23. Installation location must have, and maintain, sufficient amount of unobstructed space to provide the 80% of system production efficiency. SEC retains the right to deny rebates if Site Plan does not demonstrate minimal shading by trees, buildings and other structures.
24. All installed PV systems must carry at least 5 year warranty from supplier/ installer. Solar modules must carry a 20-year warranty from the manufacturer. Inverters must carry at least a 5 year manufacturer warranty without battery back-up.
25. If re-roofing is required, PV system removal and reinstallation is at customer's expense.
26. Customer must sign, complete and submit the PV Incentive Rebate Application. The rebate application must be accompanied by the manufacturer's rating and warranty information.
27. A PV System that has received a rebate may be relocated under the following conditions:
 - a. The customer of record is to inform the SEC in writing, providing a description of their intent/plan and contact information.
 - b. The new transferee, if applicable, shall be required to obtain approval of the relocated system by submitting a new Application and following the Scheme Application Process
 - c. The relocated system must meet all requirements under the Scheme and the Rules and Regulations, technical and operational requirements.
 - d. SEC is not responsible for any costs associated with the relocation effort.
 - e. The system will not be eligible for another rebate.
